## Directions for use:

- 1 Place brick in a leak proof container holding at least 3 gallons.
- 2 Pour in 1 gallon of water and let the brick soak for a few minutes.
- 3 Stir the expanded brick until it becomes light and fluffy. Add more water if necessary. Expands to approximately 3 gallons.

- Peat-free, sustainable natural resource
- Makes more than 3 gallons of premium potting soil
- Does not repel water like peat
- Retains moisture, increases soil aeration for enhanced growth & root development
- Cleaner to handle than typical potting soil
- Compact & easy to carry
- Organic. KoKo Pro carries the OMRI seal
