## Beneficial Mycorrhizae Fungus for Plants

**Contains beneficial root colonizing fungi**

Mycorrhizae fungi colonize plant roots and provide a number of benefits to the plant. Mycorrhizae can significantly reduce loss and decline due to poor soil conditions, and can increase plant vigor & the ability to take up nutrients and water.

**Directions for Use**

**For Flower Bed Preparation:** Mix 1 cup of MycoStim with 1 gallon of water and apply evenly over 25 square feet with a sprinkler can.

**For Transplants:** Dust MycoStim onto the root ball and into the planting hole.

**For Vegetable Row Preparation:** Mix 1 cup of MycoStim per gallon of water and apply evenly in 25 feet of seed row.

**For Established Plants:** Make a solution by mixing 1 cup of MycoStim per gallon of water. Punch holes into the root zone and pour MycoStim into the holes.

**For Treating Seeds:** Place enough MycoStim in with the seed and shake or stir to thoroughly coat the seeds.

**For Seeding Lawns:** Coat the seed by thoroughly mixing 1 cup of MycoStim per 10lbs. of seed.

**ACTIVE INGREDIENTS**

Beneficial rhizosphere microbes	% BY WEIGHT
Glomus Intraradices	8.5%
Glomus Mosseae	4 propagules per cc
Glomus Aggregatum	4 propagules per cc
Rhizopogon Villosullus	264 propagules per cc
Rhizopogon Luteolus	264 propagules per cc
Rhizopogon Amylopogon	264 propagules per cc
Rhizopogon Fulvicleba	264 propagules per cc
Pisolithus Tinctorius	10,575 propagules per cc
Trichoderma Harzianum	15,865 propagules per cc
Trichoderma Konigii	15,865 propagules per cc

**% BY WEIGHT ALSO CONTAINS NON PLANT FOOD INGREDIENTS**

8%	Humic Acids (derived from Leonardite)
7%	Sea Kelp Extract (derived from ascophylum nodosum)
76.5%	Cotton Seed Meal

**Storage Conditions**

Product is guaranteed effective for up to two years after date on package.

Store in a dry place under 140 degrees.

*The World's Leading Producer Of  
 EnviroCare Pesticides & Fertilizers*

Net Weight 1 LB. (.45kg)

- **Enhanced Growth & Nutrient Uptake**
- **Resistance to transplant shock**
- **Vigorous Plants**
- **Stress Resistance**
- **Improved plant quality, yields, and vigor**

**Colonizes the root zone to provide:**

**Includes Kelp Extracts and Humic Acid**

**Beneficial Mycorrhizae Fungus for Plants**
