

How does Organocide 3-in-1 Garden Spray work?

- Dense oil spray smothers target insects on contact
- Once liquid dries, a micro-film is left on the plant. Any hatchlings of the target insects get trapped in the film and die
- Females arriving after treatment detect the film and will not lay eggs on the treated plant; recognizing the area as hazard to their eggs
- The fatty acids in the oil are toxic to the target insects

What insects will Organocide 3-in-1 Garden Spray control?

- Organocide 3-in-1 Garden Spray kills the eggs, larvae & nymphs of insects and the adult stages of over 25 soft bodied insects including (but not limited to) fungus gnats, aphids, citrus rust mites, leaf-rollers, mealy bugs, scale insects, spider mites, thrips, *whiteflies, and hemlock wooly adelgid *Whiteflies are the most difficult insect to control because it has such a short life span and repopulates very quickly. Organocide will kill them when sprayed directly on contact but will not prevent them from coming back if left on the leaves.
- It is soft on Beneficial Insects – will not harm Bees, Butterflies, Ladybugs

What fungicidal properties does Organocide 3-in-1 Garden Spray have?

- It controls certain fungal diseases such as (but not limited to) powdery mildew, downy mildew, black spot on roses, greasy spot & helminthosporium
- Organocide 3-in-1 Spray deprives the disease spore of moisture necessary for propagation and protects the plant from germ tube penetration and spreading of pathogens such as powdery mildew

What about plant compatibility?

- When used as directed Organocide 3-in-1 Garden Spray has an unusually high degree of safety to most plants, including herbs, fruits & vegetables. However, some plants in the Euphorbia family (Crown of Thorns, Poinsettia) have shown some sensitivity. If in doubt, test first on a small area of foliage.

Since it's made of fish oil, does it smell?

- Do not confuse fish oil with fish emulsion; Organocide has a very slight fish odor that is exponentially better than fish emulsion. You will hardly notice it and the smell is gone in a couple of hours. The Ready to Use sizes are completely deodorized for in-home use.

How often should I use Organocide 3-in-1 Spray?

- For tough scale insects, a once-a-week application for 3 weeks should effectively eliminate the scale
- For all others, it will depend upon the pressures of the environment, but in general, one or 2 applications per month will usually control the problem
- It is best to apply in the morning or early evening.

How is it available?
